

March 14, 2018

1. Marijuana will be disclosed. For many years the tobacco is used, it can be cancerous to the lungs, it destroys the body, children, very young age, they smoke. Today, Alcohol is also used for a long time, it causes death, there are accidents, there are murders. When alcohol and drugs are used, the RCMP has to kill in order to protect people. These have no benefits to our lives, it has benefits in money in some way, every year people die from accidents.
2. This marijuana when it is disclosed, when people are able to possess, it will have a very big negative impact for Nunavumiut (People from Nunavut), children and adults, and anyone will start using it when it is legalized. There will be no help available in Nunavut, there is help from RCMP Mental, health workers, and health practitioners, but they have no authority when you ask for help, they cannot help.
3. In Nunavut when there is statistics taken, they say they are the most smokers, most alcohol drinkers, when marijuana is legalized, the lives of Nunavumiut will be very much ruined, there is no healing centers and no rehab centers, we will be in a state of risk of safety. Children will start smoking, their lives will be ruined. If it is not legalize, it will be better, there are no help available.
